

## Anti-lock Braking & Stability Control Systems

This seminar is designed to introduce technicians to the components and diagnostic procedures used within various Anti-lock Braking and Stability Control Systems. You will learn how the systems operate, how to diagnose faults and how to use modern equipment to make the tasks easier and more accurate.

- » **Practical testing procedures**
- » **Find out about common failures in various systems**
- » **Gain an understanding of current model stability control**
- » **BBQ Dinner supplied**
- » **Certificate of participation provided**
