

Emission Control Device Testing

The ever increasing restrictions on vehicle emissions is forcing manufacturers to design and implement new systems to control or limit production of harmful pollutants. To completely service or repair late model vehicle you must understand how the systems operate. This seminar will show you what they use, how they work and how to diagnose faults when they occur.

- » **Look at case studies of faults in Fuel Trim adaptations**
- » **Understand Oxygen Sensors & Air Fuel Ratio Sensors**
- » **Learn how to test Catalytic Convertors & EGR systems**
