

## Scan Tool & Oscilloscope Diagnostics

Many modern workshops use a scan tool with a built in oscilloscope though due to lack of opportunities staff rarely utilise the equipment to it's full potential. This seminar is a practical session using scan tools and oscilloscopes to confirm the presence and quality of engine management signals while learning how and when diagnostic codes are logged.

Both Apprentices and Tradesman will benefit from this experience.

- » **Use modern equipment to test various electronic components**
- » **Gain experience simulating various sensors**
- » **Learn to confirm faults using your oscilloscope**
- » **BBQ Dinner supplied**
- » **Certificate of participation provided**
